PROGRAMME SCHEDULE

DAY 1 | JUNE 3RD, 2026, WEDNESDAY

	Archive Room	Infante Room	D. Maria Room	D. Luís Room
08:00 08:30	REGISTRATION			
08:30 10:00	Clash of the Titans	-	ABSTRACTS	ABSTRACTS
10:00 10:30	COFFEE BREAK			
10:30 12:00	3D Anatomy	SMART Session	Value-based surgery - macro and micro vision	WS JAWS - YSW How AI can assist in writing and reviewing scientific papers
12:00 13:00	Step by step on TAR	Step by step on surgical neurectomy	Step by Step on mesh choices	ABSTRACTS
13:00 13:30	OPENING CERIMONY			
13:30 14:30	LUNCH			
14:30 16:00	Step by Step on Pre- peritoneal approach	Prehabilitation - a practical guide	Hernia Prevention as a Surgical Skill	ABSTRACTS
16:00 16:30	INDUSTRY SYMPOSIUM			
16:30 17:00	COFFEE BREAK			
17:00 18:30	Rectus diastasis in 2026: What Are We Really Treating?	Research and networking	PROMS	ABSTRACTS
18:30 19:00	WELCOME RECEPTION

PROGRAMME SCHEDULE

DAY 2 | JUNE 4TH, 2026, THURSDAY

	Archive Room	Infante Room	D. Maria Room	D. Luís Room
07:30 08:00	REGISTRATION			
08:00 09:30	Hernia 2 in 1 (Clinical cases and discussion)	Young Surgeons Wing	ABSTRACTS	Nurse Symposium - Abdominal wall rehabilitation
09:30 10:30	Consensus terminology in AWR	Hernia in Portuguese	ABSTRACTS	Nurse Symposium - Perioperative nursing
10:30 11:00	COFFEE BREAK			
11:00 11:45	INDUSTRY SYMPOSIUM	-	-	Nurse Symposium - Challenges in abdominal wall surgery
11:45 13:00	Inguinal hernia approach	Groin Pain and Sports Hernia	EHS Talks on Soft Skills	Nurse Symposium - Best FREE PAPERS
13:00 13:30	INDUSTRY SYMPOSIUM	INDUSTRY SYMPOSIUM	INDUSTRY SYMPOSIUM	
13:30 14:30	LUNCH			
14.30 16:00	Train wreck in a Second	Hernia and Soft tissue problems	JAWS	Nurse Symposium - Minimally Invasive Surgery
16:00 16:30	COFFEE BREAK			
16:30 18:00	Robotics			Nurse Symposium - Guidelines transforming into practice protocols
18:00 19:00	EHS GENERAL ASSEMBLY			
20:00 01:00	GALA PARTY

PROGRAMME SCHEDULE

DAY 3 | JUNE 5TH, 2026, FRIDAY

	Archive Room	Infante Room	D. Maria Room	D. Luís Room
08:00 08:30	REGISTRATION			
08:00 08:30	ABSTRACTS	ABSTRACTS	ABSTRACTS	
08:30 10:00	Open abdomen	Surviving as a surgeon	Abdominal wall in VHWG3	ABSTRACTS
10:00 10:30	COFFEE BREAK			
10:30 12:00	PRESIDENTIAL SESSION BEST FP / VIDEOS	What else?	ABSTRACTS	ABSTRACTS
12:00 13:30	Hernia 2050			
13:30 14.00	CLOSING AND EHS 2027			

Day 1

CONFERENCE - Clash of the Titans (90 min)

A tail from the past into the future / My personal perspective

3D Anatomy (90 min)

Talks

1. The cardinal landmarks of the extra peritoneal space - Inguinal region
2. The cardinal landmarks of the extra peritoneal space - Fénix Anatomy
3. EIT ambivium vs semilunar line
4. Clinical anatomy of Linea alba
5. The forgotten layer: why subcutaneous anatomy matters?
6. Decoding the abdominal wall: CT based anatomy

SMART Session - (90 min)

Talks

1. Do number and volume matter? Two versus Five points in Botulin Toxin
2. A volume problem - face-off between PPP and vertical traction
3. Enlarge the abdominal layers: tissue expanders
4. Old Tools, New Perspectives: Do releasing incisions still have a role?
5. Old Tools, New Perspectives: a place for chevrel technique
6. Do I still love anterior component separation?
7. CIPHER Study

Perspectives Management in AWR: Macro & Micro (90 min)

Talks

1. What is the cost of having an AWR unit in my hospital?
2. Clinical Pathways and Registries as benchmarking tools
3. A global codification for AWR - is that possible?
4. How companies can be strategic partners in AWR growth
5. Being a hernia surgeon in hard times

SCAN
ME!

STEP by STEP ON TAR (60 min)

Talks

- 1 - Open TAR
- 2- Minimal invasive TAR – Laparoscopic vs Robotics

STEP by STEP on Surgical neurectomy (60 min)

Talks

1. Mapping the nerves!
2. How do I do an open neurectomy?
3. How do I do a minimally invasive neurectomy?
4. A plan besides surgery

STEP by STEP on mesh choices (60 min)

Talks

1. Synthetic mesh
2. Synthetic long absorbable
3. Biologic and Hybrid mesh
4. Mesh suture

OPENING CERIMONY

STEP by STEP on pre-peritoneal approach (90 min)

Talks

1. PeTEP cranial approach
2. PeTEP caudal approach
3. Open preperitoneal approach
4. Achilles heel of eTEP
5. Lateral pre-peritoneal approach
6. When does pre-peritoneal goes wrong?

Prehabilitation – a practical guide (90 min)

Talks

1. A preoperative psychological rehab program
2. An abdominal conditioning program for AWR
3. Synchronous surgical treatment of obesity: what does it mean?
4. Does portal venous pressure have a prognostic role in cirrhotic patients undergoing hernia repair?
5. Hernia surgery after organ transplantation: what is the best plan?
6. Saying No to AWR: how to define frailty?

Hernia Prevention as a Surgical Skill (90 min)

Talks

1. In emergent laparotomy
2. In open abdomen
3. In transplant patients
4. Lower abdominal intraparietal: management and prevention
5. How to spread prevention beyond general surgery?
6. Abstract

Rectus Diastasis (90 min)

Talks

1. Rehabilitation in rectus diastasis – Rethinking abdominal wall and pelvic function
2. When should the abdominal wall surgeon step in?
3. When should the plastic surgeon step in?
4. Surgical Algorithm
5. Clinical outcomes after rectus diastasis management – beyond anatomical repair

Research and Networking (90 min)

Talks

1. How to unit Europe to overcome bureaucratic load in research
2. Medical writers and IA – how can they help?
3. How to conduct a registry-based RCT?
4. Best Abstract on the topic
5. Best Abstract on the topic
6. Best Abstract on the topic

PROMS and Surgical Results (90 min)

Talks

1. What, how and when should we measure PROMs?
2. Synchronous panniculectomy – Understanding cosmetic dissatisfaction after hernia surgery
3. Long term results in post TRAM AWR – how to manage patient expectations?
4. How do you measure your lifetime hernia surgery results?
5. Get order in wound events after hernia surgery
6. Standardizing hernia recurrence

Day 2

Hernia 2 in 1 (90 min)

Talks

1. Epigastric/umbilical hernia with an inguinal hernia
2. A L4 hernia with a W3 midline hernia
3. A giant hiatal hernia with a W3 hernia
4. Thoracoabdominal hernia
5. Parastomal and midline hernia
6. Perineal hernia and midline hernia

Young Wings Session (90 min)

Talks

1. Lichtenstein technique step by step and learning curve
2. TAPP/TEP step by step and learning curve
3. Rives-Stoppa step by step and learning curve
4. How training is evolving: simulators, micro-learning approaches, new educational tools. The future of robotics
5. Abdominal wall training during residency
6. Abdominal wall training after residency

Consensus terminology in AWR - EHS Porto Consensus (60 min)

Talks: TBA

Hernia in Portuguese (60 min)

Talks

1. Portugal - Keeping up with Europe in hernia treatment - reality and future challenges
2. India - Strategies to prevent and treat mesh complications
3. Brazil - Expanding the limits of BTA and PPP in the preparation of complex ventral hernia
4. Japan - Chronic pain
5. Mozambique - Hernia challenges in a low-income country

The Inguinal Verdict: Experts under pressure (75 min)

1. Clinical Case 1
2. Clinical Case 2
3. Clinical Case 3
4. Clinical Case 4

Groin Pain and Sports Hernia (75min)

Talks

1. Diagnosis
2. Pathway decision
3. When and what type of surgery?
4. How to manage non-surgical cases

EHS Talks on Soft Skills (75min)

Talks

1. Leadership
2. Communication
3. Critical thinking
4. Problem-solving
5. Teamwork

Train wreck in a second (90min)

Talks: TBA

Hernia and Soft Tissue Problems (90 min)

Talks

1. Dealing with skin and soft tissue
2. Planning and execution of a muscle flap after abdominal wall resection
3. What about seroma?
4. Dealing with post operative skin and soft tissue ischemia and infection
5. Muscle and bone absence
6. Transplantation - where are we now?

JAWS Session (90 min)

Talks: TBA

Robotics in AWR (90 min)

Talks

1. Robotic extraperitoneal Rives
2. Robotic TAR
3. Robotic lumbar hernia
4. Robotic TARM
5. Single Port Robotic Inguinal TAPP
6. Robotic PeTEP

EHS GENERAL ASSEMBLY

Day 3

Open Abdomen (90 min)

Talks

1. When AWR goes wrong - quaternary compartment syndrome
2. AWR gone wrong - enhanced recovery for open abdomen
3. An algorithm for vertical traction in open abdomen
4. Synchronous abdominal Wall Reconstruction in the open abdomen
5. Tips & Tricks in managing enteroatmospheric fistula
6. The aftermath: dealing with intestinal failure

Surviving as a Surgeon (90 min)

Talks

1. Workforce of the Future: integrating Millennial and Gen Z values in hospital environment
2. A framework for High performance without burnout
3. Train for a high impact sport: Surgery
4. Recognizing the hidden dimensions of surgical merit
5. Eat, Pray and Love
6. Life beyond Surgery

Abdominal Wall in VHWG3 (90 min)

Talks

1. Synchronous ostomy closure
2. Strangulated inguinal hernia
3. Management of Iatrogenic GI lesions during elective AWR
4. Chronic mesh infection
5. AWR goals in an ECF environment
6. Meshes in VHWG3

Presidential Session – Best Free Papers / Oscar Videos

What Else? (90 min)

Talks

1. Abdominal wall dynamics after AWR
2. Day Surgery - Limits for AWS
3. Intestinal Parastomal hernia
4. Urinary Parastomal Hernia
5. Thoracic hernias
6. Muscle atrophy bulge without hernia

Hernia 2050 (90 min)

Talks

1. Interstellar hernia risk factors
2. AI integrated in the OR
3. AI integrated in data collection
4. Mesh singularity - when mesh mimics biomechanics
5. Robotics version 14.0
6. New generation of abdominal wall surgeons

CLOSING AND EHS 2027
